Rampura, Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience building and shipping scalable web applications. Strong foundation in frontend engineering with React and Next.js, now specializing in backend development and database engineering using Node.js, Express.js, Golang, and PostgreSQL. Experienced in designing RESTful APIs, optimizing database queries, and deploying containerized services with Docker. Comfortable working across the full stack and passionate about building reliable, performant backend systems.

EXPERIENCE

Software Engineer

TechnoNext Ltd.

September 2025 – Present

Notun Bazar, Bangladesh

- Designed and built RESTful APIs using Node.js and Express.js, handling data persistence with PostgreSQL and serving 5+ integrated client applications.
- Led frontend feature development for a WTV platform, reducing average page load time by approximately 35% through code splitting and asset optimization.
- Architected and maintained PostgreSQL database schemas, writing optimized queries and adding indexes that improved query performance by up to 40%.
- Collaborated with BA and product teams to translate business requirements into technical solutions, delivering features across a 4-person engineering team.
- Containerized the application stack using Docker, establishing consistent development and production environments and eliminating environment-specific bugs.
- Integrated third-party REST APIs and implemented structured error handling and logging across backend services.

Software Engineer

TulipTech Ltd.

May 2024 – August 2025

Uttar Badda, Dhaka

- Integrated AI-driven features into a production web application, collaborating with backend engineers to design and consume RESTful APIs for real-time data processing.
- Reduced bundle size by 30% by implementing route-based code splitting and lazy loading, significantly improving Time to Interactive on low-bandwidth connections.
- Partnered with the backend team to define API contracts, reducing integration bugs and cutting frontend-backend handoff time by roughly 20%.
- Refactored shared component library into a modular, reusable architecture, reducing duplicate code by over 40% and improving long-term maintainability.

Junior Software Engineer

TulipTech Ltd.

April 2022 – April 2024

Uttar Badda, Bangladesh

- Built responsive, pixel-perfect web interfaces using React.js and JavaScript (ES6+) from Figma designs, supporting multiple screen sizes and browsers.
- Established a reusable, scalable component-based architecture adopted across 3+ projects, reducing average development time for new features.
- Integrated RESTful APIs and managed server-state with React Query, eliminating redundant network requests and improving data consistency across views.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, React Query

Backend: Node.js, Express.js, Golang, REST API Design, JWT Authentication

Database: PostgreSQL, MongoDB, Schema Design, Query Optimization, Indexing, Database Migrations

Tools & DevOps: Git, Docker, Linux, Firebase, Postman

EDUCATION

East West University

B.Sc. in Computer Science; CGPA: 3.06/4.00

Dhaka, Bangladesh

2016 – 2021

Dhaka City College

Higher Secondary Certificate (HSC); GPA: 5.00/5.00

Dhaka, Bangladesh

Willes Little Flower School

Secondary School Certificate (SSC); GPA: 5.00/5.00

Dhaka, Bangladesh

PROJECTS

Cartup E-Commerce Platform | *GoLang, NextJS, ReactJS, Tailwind CSS, PostgreSQL*

- Developed the backend in Golang, designing RESTful API endpoints for product catalog, cart management, order processing, and user authentication using JWT.
- Designed and managed a PostgreSQL relational database schema covering users, products, orders, and inventory with proper indexing for high-read performance.
- Containerized the full application stack with Docker, enabling reproducible local development and simplified deployment workflows.
- Built the storefront frontend with Next.js and Tailwind CSS, integrating seamlessly with the Go backend APIs.
- Website: cartup.com

Empathika | *TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL*

- Contributed to full-stack development of a mental health web application, building RESTful API integrations and implementing dynamic UI components.
- Handled complex async data flows using React Query, reducing unnecessary re-fetches and improving perceived performance for end users.
- Worked closely with backend engineers to define API contracts and ensure type-safe data handling end-to-end with TypeScript.
- Website: app.empathika.com

iThrive Wellness Platform | *React, Next.js, TypeScript, Tailwind CSS*

- Built a fully responsive, cross-browser wellness platform from Figma designs, achieving consistent rendering across mobile, tablet, and desktop viewports.
- Implemented performance optimizations including image lazy loading and dynamic imports, improving Lighthouse performance score significantly.
- Website: ithrive365.thrivess.org

EXTRA-CURRICULAR ACTIVITIES

• Coding Mentor, Student Bootcamp

Jul 2024 – Dec 2024

Mentored 10+ junior developers on React and Next.js fundamentals, guiding them through building and deploying small full-stack projects.

• Hackathon Participant

Mar 2019

Collaborated in a team to design and ship a working web application within a 24-hour hackathon, placing among the finalists.
